

TV-1

COMPUTER HOBBYISTS!

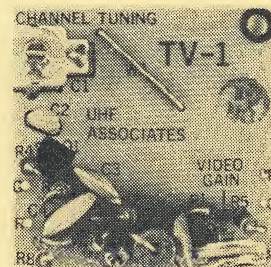

VIDEO ENTHUSIASTS!

You will want to know about the TV-1 Video to Television Interface Kit.

No need to buy a separate Video Monitor if you already own a TV set. Just connect the TV-1 between your system video output and the TV set antenna terminals—that's all there is to it—to convert your TV set to a Video Monitor, and at a much lower cost!

Just look at these features and compare:

- ✓ Tunes *continuously* from Channels 2 to 6 without any rewiring or tap changing.
- ✓ Operates from any *Positive (+)* power source from +5 to +12 volts with negative ground—will work with standard *TTL* or *Computer* power supplies.
- ✓ Silk-screened and solder masked P.C. Board made of glass epoxy—*easy to build* and *reliable*.
- ✓ True A.M. video modulation using video mixer diodes.
- ✓ So small that it can be conveniently installed in existing equipment.
- ✓ Includes schematic, complete instructions and applications information.
